47, bd. A. Blanqui
Paris XIII

Mechanicam vero duplicem Veteres constituerunt: Rationalem quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique Mechanica nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut Mechanica omnis a Geometria ita distinguatur, ut quicquid accuratum sit ad Geometriam referatur, quicquid minus accuratum ad Mechanicam. Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.

NEWTON

La généralité que j'embrasse, au lieu d'éblouir nos lumières, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité.

EULER

Ceux qui aiment l'Analyse, verront avec plaisir la Méchanique en devenir une nouvelle branche ...

LAGRANGE

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely in original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

CONTENTS OF VOLUME 2

	Page
BLANKFIELD, JUDITH, & G. C. McVITTIE, Einstein's Equations and Classical Hydrodynamics	337
BLANKFIELD, JUDITH, & G. C. McVITTIE, A Method of Solution of the Equations of Magnetohydrodynamics	411
BUTZER, P. L., Die Anwendung des Operatorenkalküls von JAN MIKUSIŃSKI auf lineare Integralgleichungen vom Faltungstypus	114
COLLATZ, L., Näherungsverfahren höherer Ordnung für Gleichungen in Banach-Räumen	66
COPSON, E. T., & A. ERDÉLYI, On a Partial Differential Equation with Two Singular Lines	76
DROBOT, S., & A. RYBARSKI, A Variational Principle of Hydromechanics . . .	393
DUFFIN, R. J., & WALTER NOLL, On Exterior Boundary Value Problems in Linear Elasticity	191
ERDÉLYI, A., see COPSON	
GERISCH, WOLFGANG, Zum Problem der an den Rändern fest eingespannten, elastischen Platte	227
GOLOMB, MICHAEL, Expansion and Boundedness Theorems for Solutions of Linear Differential Systems with Periodic or Almost Periodic Coefficients . .	284
HALE, J. K., A Short Proof of a Boundedness Theorem for Linear Differential Systems with Periodic Coefficients	429
IKENBERRY, E., see JOHNSON	
JOHNSON, D. E., & E. IKENBERRY, Developments toward a Series Solution of the Maxwell-Boltzmann Equation	41
KAZARINOFF, NICHOLAS D., Asymptotic Theory of Second Order Differential Equations with Two Simple Turning Points	129
KREYSZIG, ERWIN, On Singularities of Solutions of Partial Differential Equations in Three Variables	151
KURTH, RUDOLF, Die Zustandsgleichung der klassischen statistischen Mechanik	32
LEIS, ROLF, Über das Neumannsche Randwertproblem für die Helmholtzsche Schwingungsgleichung	101
LEIS, ROLF, see MÜLLER	
LUDFORD, G. S. S., & S. H. SCHOT, Sonic Limit Singularities. Part I: General Theory	160
LUDFORD, G. S. S., & S. H. SCHOT, Sonic Limit Singularities. Part II: Examples	173
McVITTIE, G. C., see BLANKFIELD	

	Page
MÜLLER, CLAUS, & ROLF LEIS, Über die Potentialfunktionen von Kurvenbelegungen	87
NICKEL, KARL, Einige Eigenschaften von Lösungen der Prandtlischen Grenzschicht-Differentialgleichungen	1
NOLL, WALTER, A Mathematical Theory of the Mechanical Behavior of Continuous Media	197
NOLL, WALTER, see DUFFIN	
OSTROWSKI, A. M., On the Convergence of the Rayleigh Quotient Iteration for the Computation of the Characteristic Roots and Vectors. II	423
RABENSTEIN, ALBERT L., The Determination of the Inverse Matrix for a Basic Reference Equation for the Theory of Hydrodynamic Stability	355
RIVLIN, R. S., The Deformation of a Membrane Formed by Inextensible Cords	447
RIVLIN, R. S., see SPENCER	
RYBARSKI, A., see DROBOT	
SCHOT, S. H., see LUDFORD	
SCHRÖDER, JOHANN, Fehlerabschätzungen bei gewöhnlichen und partiellen Differentialgleichungen	367
SPENCER, A. J. M., & R. S. RIVLIN, The Theory of Matrix Polynomials and its Application to the Mechanics of Isotropic Continua	309
SPENCER, A. J. M., & R. S. RIVLIN, Finite Integrity Bases for Five or Fewer Symmetric 3×3 Matrices	435
WITTING, HERMANN, Über den Einfluß der Stromlinienkrümmung auf die Stabilität laminarer Strömungen	243
